EDUCATION

Collège La Cité

September 2025 – April 2028 (Expected)

Diploma in Computer Programming (Co-op), 1st Year Standing

CGPA: 3.76

- Currently seeking my first co-op internship in software development.

Conestoga College

January 2025 – August 2025

English Language Studies Certificate (General Arts and Science)

Kitchener, ON

Abbes Laghrour University

2012 – 2018

University studies in Software Engineering

Khenchela, Algeria

WORK EXPERIENCE

Cereals and Dry Legumes Cooperative

January 2018 – June 2024

IT Specialist

Khenchela, Algeria

- Managed information systems and databases, ensuring data integrity and confidentiality across the organization
- Provided technical support to staff and maintained the IT infrastructure on Windows and Linux environments
- Automated repetitive data-entry and reporting tasks, improving accuracy and saving processing time

PROJECTS

Perceptual Noise Modeling in Digital Images (C++, Qt, CMake)

[Project Link](#)

- Implemented image-quality metrics (PSNR, MSE, Linfoot criteria) and a visual-perception model (Itti-Koch saliency map) with a Qt graphical interface
- Documented and published the project on GitHub with a modular architecture and cross-platform CMake build
- New academic projects will be added to my GitHub as I progress through my program

SKILLS

Summary

- **Programming languages:** C++, Python, SQL (MySQL), JavaScript
- **Web & mobile development:** HTML, CSS, client-side JavaScript; Android mobile development
- **Tools and environments:** Git, GitHub, VS Code, Visual Studio, Qt Framework, Linux, Windows
- **Core concepts:** Object-oriented programming, software quality assurance, relational databases, operating systems administration, networking fundamentals (TCP/IP), systems analysis, data structures, software testing, cybersecurity fundamentals

Technical Skills

- Developed and published a complete image-processing application in modern C++ with a Qt GUI, using Git for version control
- Designed relational databases and wrote SQL queries with MySQL for academic and professional use
- Applied software quality assurance practices: structured testing, debugging and code documentation

Communication Skills

- Fully bilingual: daily communication in French and English, both verbally and in writing
- Strong teamwork and adaptability developed in professional and multicultural environments
